

- ▶ Brush pool walls and floor. Vacuum any debris from the pool floor.
- ▶ Clean the filter with GLB® Filter Cleanse®.
  
- ▶ Add GLB® Oxy-Brite® non-chlorine shock oxidizer (1 lb. per 10,000 gals.) to destroy organic contaminants.
- ▶ Add GLB® Algimycin® 2000 algaecide (32 fl. oz. per 10,000 gals. for solid-covered pools, 64 fl. oz. per 10,000 gallons for mesh-covered or uncovered pools) to prevent algae growth throughout the winter.
- ▶ Add GLB® Sequa-Sol® sequestering agent (use the initial dose of 16 fl. oz. per 10,000 gals.) to protect the pool from stains and scale formation. Allow water to circulate for 12-24 hours.
  
- ▶ After cleaning and treating the pool, lower the water if you are in an area where the water must be lowered due to freezing conditions.
- ▶ Drain all water from pipes, pumps, heaters, filters and other pool equipment according to the manufacturer's directions.
- ▶ Cover pool as necessary.
